

Cornerstone™ ModLibs

Current Cornerstone Model Support Libraries (ModLibs) - Including Recent Additions

Model Support Libraries are added on an ongoing basis. This list shows the software model numbers and current contents of the ModLib Packages that are available. Standard Cornerstone Configurator, Base Station, and Field Station software provide Generic HART instrument support using HART Universal and Common Practice commands. Full instrument configuration support, including Instrument Specific commands, requires the use of one or more of the following optional ModLib Packages.
